MESSAGE

E-Learning is the happening of the day. The huge availability of skilled manpower and education for the masses in an expansive and geographically dispersed and multilingual country like ours can only become a reality through e-Learning only.

It is our pleasure to get associated with the Ministry of Communications & Information Technology, C-DAC, DOEACC, Media Lab Asia in hosting such an important national event which is very relevant to the Educational Institutions and Industry today in fulfilling to the needs and demands of the students and learners. JNT University is already having an MOU with C-DAC and very soon its facilities are going to be located in our campus.

JNT University has initiated conducting all internal examinations on-line for the students including those who are studying in the affiliated colleges. Through SONET project, we have networked all the Engineering Colleges affiliated to the University to facilitate the use of modern electronic media for web based learning, video conferencing, direct telecast, electronic classrooms etc. and to improve the instructional material, methods, teaching practices and educational content.

I am sure the Seminar will become a forum for the experts to prepare a National Road Map for e-Learning. We will look forward to more such joint initiatives to bring awareness in cutting-edge technologies.

05-07-2005

(Dr. K. Rajagopal)
